D. AWARDS PRESENTED AT THE 1983 DAIRY CONVENTION 79

E. ROP HERDS IN NORTH WESTERN ONTARIO 80

1983 DAIRY FARM BEAUTIFICATION AWARDS

WINNER: Norman & June Holme
Steinbach, Manitoba

- After working several years as a welder, Norman started farming with his father in 1968 and in 1973 he and his wife took over the 560 acre spread.
- In 1981 they built a new stanchion type barn milkhouse complete with pipeline milking.
- Today they have a herd of about 120 animals, 50 on the milking line producing about 1,600 liters of milk every two days. The herd has been A.I. bred for the past 10 years and Owner/Sampler records are kept.
- Mr. & Mrs. Holme have 2 children; both girls, Kim who is 15 and Marcia who is 12. The Holme's work together around the dairy farm and like it to be known as a family operation.

RUNNER-UP: Abram & Ann Friesen
Ste. Anne, Manitoba

- Abram & Ann Friesen have been farming at their present location for the past 20 years.
- They have a small 80 acre farm and purchase their dairy ration from the Hart Feed Co.
- They have a stanchion barn with pipeline milking.
- They have a herd of about 45 head of Holstein cattle, 25 milking and 20 replacement heifers.
- They have always shipped their milk to the Bothwell Cheese Plant.
- Mr. & Mrs. Friesen have four sons: Peter - 24, Jake - 22, Ed - 20, Dan - 15.

FOREWORD

It is with pleasure that the Animal Industry Branch of Manitoba Agriculture presents the publication of the 1983 Milk Recording Annual Summary.

As specified by CMRB rules, only the provincial average and producer's name are published for the Owner Sampler program. Producers on R.O.P., official DHIA and regular DHIA, the herd averages are listed in descending order of production, based on the composite BCA for milk and butterfat.

During the year efforts were made to improve and maintain the turn around time of herd reports. Although progress was made towards providing a better and higher quality service to dairymen, there are still areas where improvements can be made.

In 1983 dairy producers in Manitoba continued to show great interest in Milk Recording with 4 new herds enrolling on ROP, 27 on DHIA and 27 on Owner Sampler, for a total of 58 new herds. During the year more names were added to the established waiting list for supervised testing. Also, on June 14, 1983 the Norfolk DHIA was organized to service producers in the MacGregor - Austin - Portage la Prairie area.

Average milk and fat production per cow on all three milk recording programs increased by 152 kg for milk and 6 kg for butterfat.

During 1983 Mr. Emerson Trout was appointed Milk Records Co-ordinator to replace Ms. Anne Harrop, and seven new DHIA supervisors were hired.

With the active promotion of purebred dairy cattle by the Holstein clubs throughout the province, we saw a 2.2% increase in the numbers of Registered cows enrolled on DHIA.

Producers also continued to show interest in the NIP program by submitting over 800 more NIP formsets in 1983 then in 1982.

We are indebted to the dairy staff of Agriculture Canada, namely Mr. Herman Bouw for tabulating the statistical information and to Pam Howe for listing the ROP herd averages by using a computerized word processor.

Acknowledgement and thanks are due to Emerson Trout for compiling the Owner Sampler information and to Sharon Williams for typing the DHIA and Owner Sampler sections of this report.

It is hopeful that the continued support of Manitoba Agriculture staff, the efforts of the DHIA supervisors, and the promotion by other dairy organizations, that in the future the province will benefit from an even greater expansion of Milk Recording.

M. S. Fraser
Provincial DHIA Fieldman

FOREWORD

May I, at the outset, congratulate all the dairy producers who have shown interest in the Milk Recording programs in Manitoba. Also, I would like to thank the executive and supervisors of the 21 Dairy Herd Improvement Associations for the efforts and dedication they have shown to the program.

Milk Recording has undergone some major expansion in the past three years. Manitoba has shown a 29 percent increase in herds and cows recorded on one of the three programs offered in Manitoba, i.e., ROP, DHIA and Owner Sampler. We now have 42.9 percent of the herds enrolled on a Milk Recording program.

Dairymen on a Milk Recording program have shown a steady increase in production per cow. The present economic times require improved efficiency in order to reduce costs. This goal is being achieved through culling low producers and selecting top performing replacement animals. The increase in Registered and NIP identified animals is an indication that dairymen are selecting and breeding for improved milk production and conformation in their dairy herds.

Discussions are ongoing with the Manitoba Milk Recording Committee with the objective of cost sharing of Milk Recording programs. Further changes may occur throughout the whole industry, as a National review has been undertaken to study all Milk Recording programs in Canada. Manitoba Agriculture continues to participate in the development of a new National Milk Recording computer program. In addition to basic milk recording, the new computer program will include the following options: somatic cell counts, basic feed balancing package, advanced feeding package, herd management pocket guide, reproductive management report, genetic herd profile, herd health reports, heifer management package and on-farm computer link.

Manitoba Milk Recording has enjoyed a successful year during 1983. We look forward to the many new positive changes ahead in 1984 and 1985.

Allan H. Steinke
Administrator, Milk
Recording Program

1983
HIGHEST PRODUCING DHIA HERD

The recipients of the highest producing DHIA herd for 1983 are Roland and Susan Vane of Stockton, Manitoba.

The Vane's were also the recipients of this award for the previous four consecutive years, with the following production.

	Ave. No. of Cows	Kg Milk	Kg Fat	% B.F.	Kg Prot.	% Prot.	BCA Milk	BCA Fat	Ave. BCA	C.I. Months
1983	18	9288	319	3.43	282	3.0	194	185	189.5	12.6
1982	19	8605	307	3.50	260	3.0	180	170	175.0	12.1
1981	19	8084	288	3.56	-	-	176	166	171.0	12.4
1980	19	7871	276	3.50	-	-	172	162	167.0	13.5
1979	19	7464	272	3.60	-	-	159	156	157.5	13.3

The Vane's have not only gradually improved their production per cow but have also managed to maintain a favorable calving interval.

Kleefeld	Larry Weibe	Henry Kehler	Nov./83

HERD SIZE OF MANITOBA DAIRY FARMS

The herd size of Manitoba dairy farms was calculated from the cow numbers (milking and dry) as compiled by the Dairy Inspectors. The numbers are based on 1096 herds (1184 total for Manitoba).

Herd Size	Number	Percent Herds
400+	1	.1
200 - 300	4	.4
100 - 200	15	1.5
80 - 100	50	5
60 - 80	101	9
40 - 60	352	32
740	573	52
	1096	100

Weighted Average - 49 Cows

The average herd size of producers enrolled on Milk Recording program's in Manitoba is 45 cows. This compares favourably with the weighted average herd size of 49 cows.

These figures indicate that the majority of our producer clients operate a small family farm and that most dairy operations comprise a mixed dairy-grain enterprise.

PROCEDURE AND RULES FOR OFFICIAL DHIA

PROCEDURES:

1. Complete N.I.P. formsets for all grade cows.
2. After receiving processed N.I.P. cards from JDBC, complete an application for official DHIA and return this to the Milk Recording office.
3. When the supervisor completes the first special information sheet your herd will be on official DHIA.

RULES:

1. All cows in the herd must be positibely identified by registration paper or processed N.I.P. card.
2. Co-operate with D.H.I.A. Supervisor in testing milk weighing devices prior to the evening milking on test day.
3. Sign the computer barn sheet verifying that production and status dates are correct.
4. Put up Supervisor for the night (if requested) on rotational tests (2 times per year).
